

**Alpesh Doshi**

Consultant Clinical Embryologist and a co-founder of IVF London

Co-founder and director of the Embryology and PGD Academy

Honorary Lecturer, University College London

Alpesh is a consultant Clinical Embryologist and a co-founder of IVF London. He is also a co-founder and director of the Embryology and PGD Academy. Alpesh previously worked at the Centre for Reproductive and Genetic Health in the leading capacity as a Director of Embryology for 19 years and was pivotal in optimising the success rates. He was also an honorary consultant at the Reproductive Medicine Unit at UCLH NHS Trust. He holds a postgraduate degree in Human Reproductive Medicine and has qualified from the prestigious Imperial College School of Medicine. Alpesh is a Diplomate of the Royal College of Pathologists and also a ESHRE certified Senior Embryologist. He has been an executive committee member of several international embryology societies and holds a very active interest in promoting education platforms through these professional bodies. He was among the first scientists to bring the egg and embryo freezing technology of 'vitrification' to the UK in 2007. He is a world renowned expert in the biopsy of human embryos for genetic testing. Alpesh has authored several papers in high impact journals and written several book chapters in addition to being an honorary lecturer at University College London where he teaches embryology on two of the Masters courses. He has been an invited speaker in many international conferences and workshops as well as several Health chat shows on television including Zee TV and ITV's This morning. Alpesh has a special interest in fertility preservation, preimplantation genetic diagnosis and genome editing of embryos.
