

Irene Dimitriadis

Reproductive Endocrinologist, Reproductive Surgeon, Obstetrician/Gynecologist
Instructor of Obstetrics, Gynecology and Reproductive Biology
Harvard Medical School

Irene Dimitriadis, MD is a fellowship-trained reproductive endocrinologist and infertility specialist at the Mass General Fertility Center. A native of Greece, she received her medical degree from the University of Athens and completed her OB/GYN residency at Tufts Medical Center in Boston. She completed her clinical fellowship in reproductive endocrinology and infertility (REI) at Mass General. She subsequently joined the faculty at Harvard Medical School as an instructor of OB/GYN & reproductive biology. Her clinical interests include caring for women with infertility, recurrent pregnancy loss, congenital uterine anomalies, polycystic ovarian syndrome, fibroids, uterine polyps, endometriosis and premature ovarian insufficiency, as well as women interested in fertility preservation, preimplantation genetic testing and third party reproduction. She participates in the care of women requiring assisted reproductive technologies, including ovulation induction and IVF. Dr. Dimitriadis is also actively involved in research. She has authored articles and presented research projects at national and international conferences and received prestigious awards from the American Society of Reproductive Medicine. She is interested in understanding how environmental factors can affect the reproductive system and was a part of the NIEHS funded EARTH study, collaborating with the Harvard T.H. Chan School of Public Health. She loves teaching trainees and believes educating is imperative in moving the field forward. Her care philosophy includes a team-based approach to patient care, with the patient playing a critical role in the team. She believes in individualized care for each patient, in order to help them meet their family-building goals. Most of all, she values the opportunity to foster a trusting relationship with her patients and support them through the unexpected, and sometimes overwhelming, challenges of their journey.
