

Chelsey Leisinger, MS, PhD, HCLD/CC is the Vice President of Network Lab Compliance for CCRM Fertility. Dr. Leisinger enjoys the challenges of working in the fertility field and has a particular interest in laboratory compliance and risk mitigation to enhance the fertility experience and increase safety for both laboratory technologists and the patients they help.

She earned a Bachelor of Science degree at Iowa State University, where she first became interested in reproduction and embryology. She completed a Master of Science program at the Ohio State University College of Veterinary Medicine and obtained her PhD in Biomedical and Veterinary Medical Sciences, with a focus on reproductive physiology, at Louisiana State University School of Veterinary Medicine. During that time, she traveled regularly to the West Coast to assist with batch IVF cycles at a busy Seattle fertility center as a consulting senior embryologist.

Prior to joining CCRM Dr. Leisinger worked at a network fertility company where she served as an off-site laboratory director for four of their laboratories across 3 states, Louisiana, Michigan, and Ohio. She currently serves as an adjunct faculty in the Department of Ambulatory Medicine and Theriogenology at Tufts University Cummings School of Veterinary Medicine. She enjoys teaching and training assisted reproductive laboratory techniques and collaborating with research and clinical reproductive work across multiple domestic species.
