

SHORT CV DIONYSIOS PALERMOS

Dionysios Palermos is a PhD candidate in Public Health and Epidemiology at the University of West Attica, focusing on the impact of financial crises on cardiovascular health among socioeconomically vulnerable populations. He holds an MSc in Clinical Trials: Design and Conduct from the Medical School of the National and Kapodistrian University of Athens, graduating with First-Class Honours, and an MPharm from the same university.

He has over three years of professional experience as a Medical Writer at Optimapharm Greece, where he contributes to the design, conduct, and reporting of phase I–IV clinical trials across oncology, cardiology, respiratory medicine, immunology, and autoimmune diseases. His expertise includes research methodology, data management, biostatistics, and systematic reviews, with multiple peer-reviewed publications in *Maturitas*, *Frontiers in Public Health*, *Acta Neuropathologica Communications*, and the *Journal of Clinical Medicine*.

Dionysios has delivered academic lectures for postgraduate students of the Medical School of Athens on causal inference, correlation analysis, and systematic review methodology. His current academic and professional interests lie in clinical research methodology, applied biostatistics, study design, and evidence synthesis for clinical and epidemiological research.
